Integra Networks is one of the world's leading providers of virtualization solutions with over twenty-five years of experience in architecting, building and supporting enterprise-level technology solutions. Integra Networks has implemented virtualization technology projects for the majority of departments within the Canadian federal, provincial and local governments, as well as educational institutions, and health care organizations.

Integra Networks is a certified reseller for most of the industry's leading vendors with primary focus on data center virtualization. It is a VMware Premier Solution Provider Partner, one of only fifteen in Canada. The company was recognized as the VMware top partner in North America amongst its peer group for thought leadership, and received the VMware Canadian Federal Government Partner Award.

Its business and technical executives are members of both VMware's North America Partner Advisory Council and the Partner Technical Advisory Board, placing the company in a unique position in that it has gained an in-depth understanding of the future direction of virtualization technology.

Integra Networks' team benefits from the best IT industry certifications and practical project experience. Whether its clients need to optimize an existing environment, implement an enterprise storage solution, design and implement a virtualized data center, or need direction on new technologies, it can create IT solutions that align with their strategic and operational goals.

All Integra Networks' service engagements include an element of education to enable its clients to quickly become self-sufficient. This is achieved through knowledge transfer, detailed documentation, workshops, and formal classroom training adapted to meet the specific needs of its clients.
