

Business Continuity

Phone: +1.866.657.7620
Email: sales@integranetworks.com

Disasters come in many shapes and sizes—from the extreme to the more likely daily disruptions that can still equate to downtime and loss. The chances are that a disaster, however minor it may be, will disrupt your network, if only for a short time. Do you have a strategy in place for dealing with such a crisis?

We can offer you solutions for business continuity that can include industry leading tools such as VMware® vCenter™ Site Recovery Manager™ (SRM), VMware® High Availability (HA) and Fault Tolerance. Integra can seamlessly integrate such tools with other best-in-class solutions from different manufacturing partners.

With our solutions you'll avoid loss of productivity through affordable uptime, and you'll avoid data loss and the resulting impact to your business: cost of downtime, loss of customers, damage to reputation and credibility.

We have great relationships with industry leading vendors and with VMware—we have the highest level of VMware certifications and accreditations. Our early access to new technologies means that we have in-depth experience in these technologies when they become widely available, allowing us to architect future-proof solutions.

OUR BUSINESS CONTINUITY SERVICES INCLUDE:

- Disaster Recovery
- Backup & Restore

Contact us. With our Business Continuity solutions we can transform your data center into a zero downtime environment.
